

## ***Fishing Report, Lake Guntersville 2/4/12***

Fishing this week remained extremely strong, even after muddy water and a lot of current fisherman caught big fish and plenty of them. The down side was the bass are moving in and out, there not feeding all day long so you spent plenty of down time. When they turned on it was hard and fast and a lot of action!

I don't know that I can say that there was a bait of choice, as it seemed that if you were where the fish were feeding you could catch them an anything you fished. There were times where the rattle bait was strong, the jig bite was on and the A-rig bite was great.

Fishing is good the pre spawn run is close, and the good times are just beginning for this year!
